

# TEJ GANGUPANTULA

(209)-600-5060 | [tejgangupantula@gmail.com](mailto:tejgangupantula@gmail.com) | [LinkedIn](#) | [Portfolio](#)

## EDUCATION

**University of California, Santa Barbara**

*B.S. Statistics and Data Science*

**Santa Barbara, CA**

*September 2023 – Present*

- **GPA:** 3.55
- **Relevant Courses:** Intermediate Python, Data Science with R/SQL, Linear Algebra, Probability and Statistics, Data Retrieval and Analysis, Regression Analysis

## PROFESSIONAL EXPERIENCE

**Agentman.ai**

*AI Agent Development Intern*

**Berkeley, CA**

*June 2025 – Present*

- Developed and deployed workflow-first AI agents using Google Cloud Platform to automate healthcare processes like insurance eligibility checks, prior authorization submission, and patient appointment management.
- Built and refined a web scraper agent targeting the Tebra platform to extract physician contact data, supporting outreach and interview coordination; collected data on over 300+ providers to aid user research.
- Collaborated on an experimental ecommerce agent integrating with Model Context Protocol (MCP) server architecture; contributed to multi-agent orchestration and testing using custom playground tools, improving agent response accuracy by ~20% during internal trials.

**FusionCare.ai**

*Machine Learning Intern*

**Davis, CA**

*July 2024 – September 2024*

- Designed and optimized a Gen AI-powered application in Python to analyze patient notes from a medical practice, producing detailed visit summaries, tracking patient outcomes, and evaluating the effectiveness of care plans to enhance obesity care management.
- Developed and deployed predictive models using scikit-learn and random forest algorithms, achieving 80-85% accuracy in forecasting patient outcomes, thereby improving data-driven decision-making in healthcare.
- Partnered with cross-functional teams to integrate advanced GPT models, enhancing the efficiency and scalability of healthcare solutions in a dynamic startup environment.

**UCSB Campus Concessions**

*Concessions Event Staff*

**Santa Barbara, CA**

*February 2024 - Present*

- Collaborated with the Event Staff to deliver high-quality food service to guests at various on-campus events (athletic events, tournaments, concerts).
- Ensured smooth operations in a fast-paced environment, demonstrating strong problem-solving and multitasking skills.

## PROJECTS

**Brain Tumor Classification**

*January 2025 – April 2025*

- Developed a Convolutional Neural Network model using TensorFlow and Keras to classify brain tumors (glioma, meningioma, pituitary tumor, no tumor) with 95% accuracy on test data, leveraging a dataset of 7,000+ MRI scans.
- Implemented data preprocessing and augmentation techniques (rotation, flipping, brightness adjustment) to improve model performance and ensure robust predictions; visualized results using matplotlib, scikit-learn and seaborn.
- Demonstrated potential to revolutionize diagnostics by enabling early, accurate, and accessible AI-powered brain tumor classification, supporting personalized care and improved patient outcomes.

**NBA Finals Outcome Prediction Analysis**

*April 2025 – June 2025*

- Developed a Random Forest classification model in Python to simulate and predict 2025 NBA Finals outcomes, achieving 62% test accuracy using team-level regular season and playoff metrics.
- Engineered a Monte Carlo simulation to estimate championship probabilities over a best-of-seven series, predicting a 75.5% chance of the Oklahoma City Thunder winning against the Indiana Pacers (24.5%).
- Cleaned, processed, and analyzed historical NBA data with pandas, numpy, and scikit-learn, enabling interpretable model outputs and supporting data-driven sports analytics.

## ACTIVITIES & LEADERSHIP

**Data Science UCSB**

*Member*

**Santa Barbara, CA**

*September 2024 – Present*

## SKILLS

**Languages:** Python, R, SQL, Java, Javascript, HTML

**Libraries:** Scikit-Learn, Tensorflow, Keras, Pandas, Numpy, Matplotlib, Seaborn, Streamlit, OpenAI, Langchain

**Tools/Frameworks:** Git, Jupyter, GCP, Django, Tableau
